

CyberMed Corporation

CyberMed is a healthcare IT company specializing in a wholly integrated technology solution. Our platform includes EHR, Revenue Cycle Management, Telehealth, Remote Care, and Data Analytics. Can be integrated into your existing platform.

EHR

EHR - designed by doctors. Value added features including meaningful use certified, e-prescribing, lab interface, insurance verification.

CyberMed is a complete, full-service, end-to-end health care IT enterprise-software provider, HIPAA-compliant, cloud-based platforms replete with mature and securely linked back-end data network of centers. The CyberMed solution is reliable, resilient and is a globally scalable platform designed to specifically suit modern healthcare's needs.

Remote Care

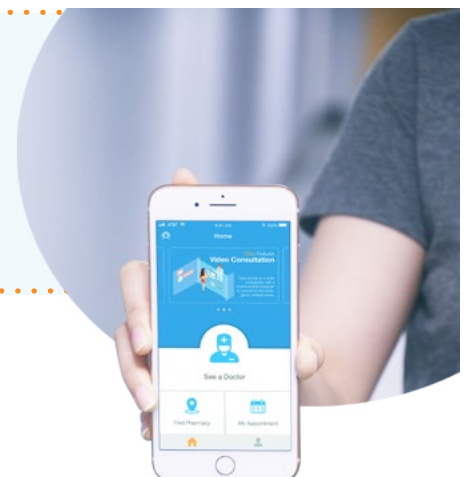

The Remote Care program utilizes a collection of IOT to capture a wide range of health data, such as blood pressure, blood oxygen level, blood sugar, weight, and heart rate. The data is then transmitted to your health care providers in real time, allowing for immediate actionable steps if necessary.

Telehealth

Telehealth uses remote service technologies to offer affordable, accessible care for patients in the comfort of their homes or offices.

CDoc Online is an advanced telehealth app using video technology for a virtual doctor appointment.
